

What We Do ▾

What We Think

Who We Are

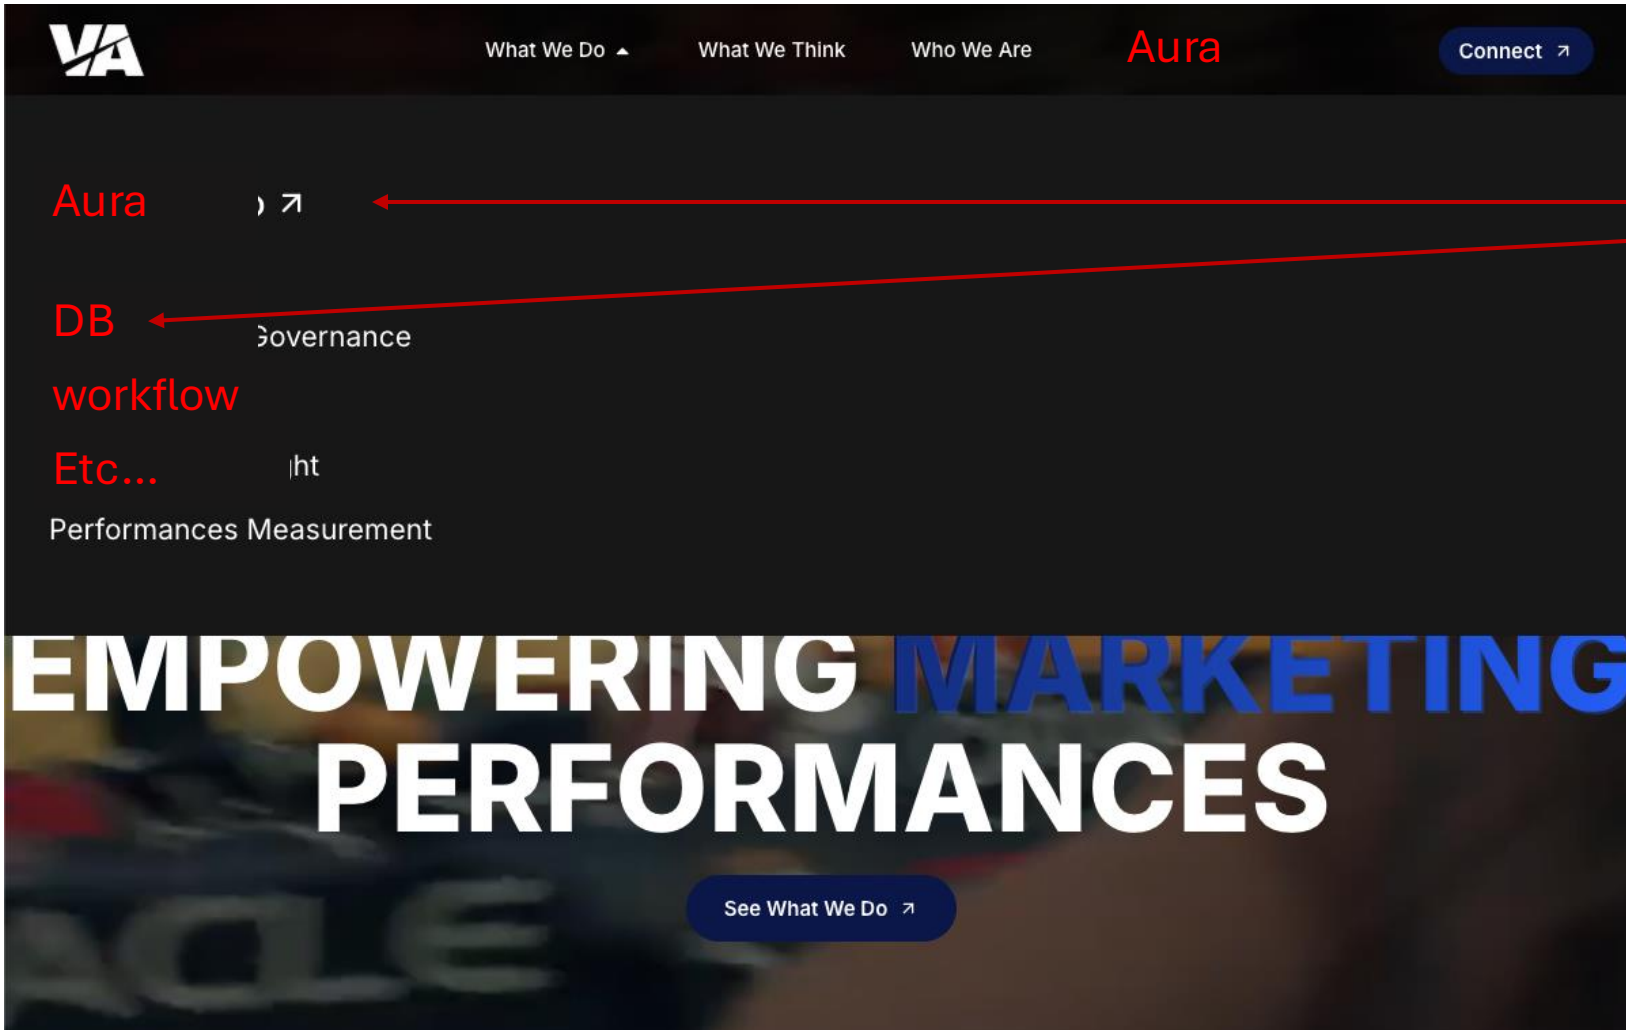

Aura

Connect ↗

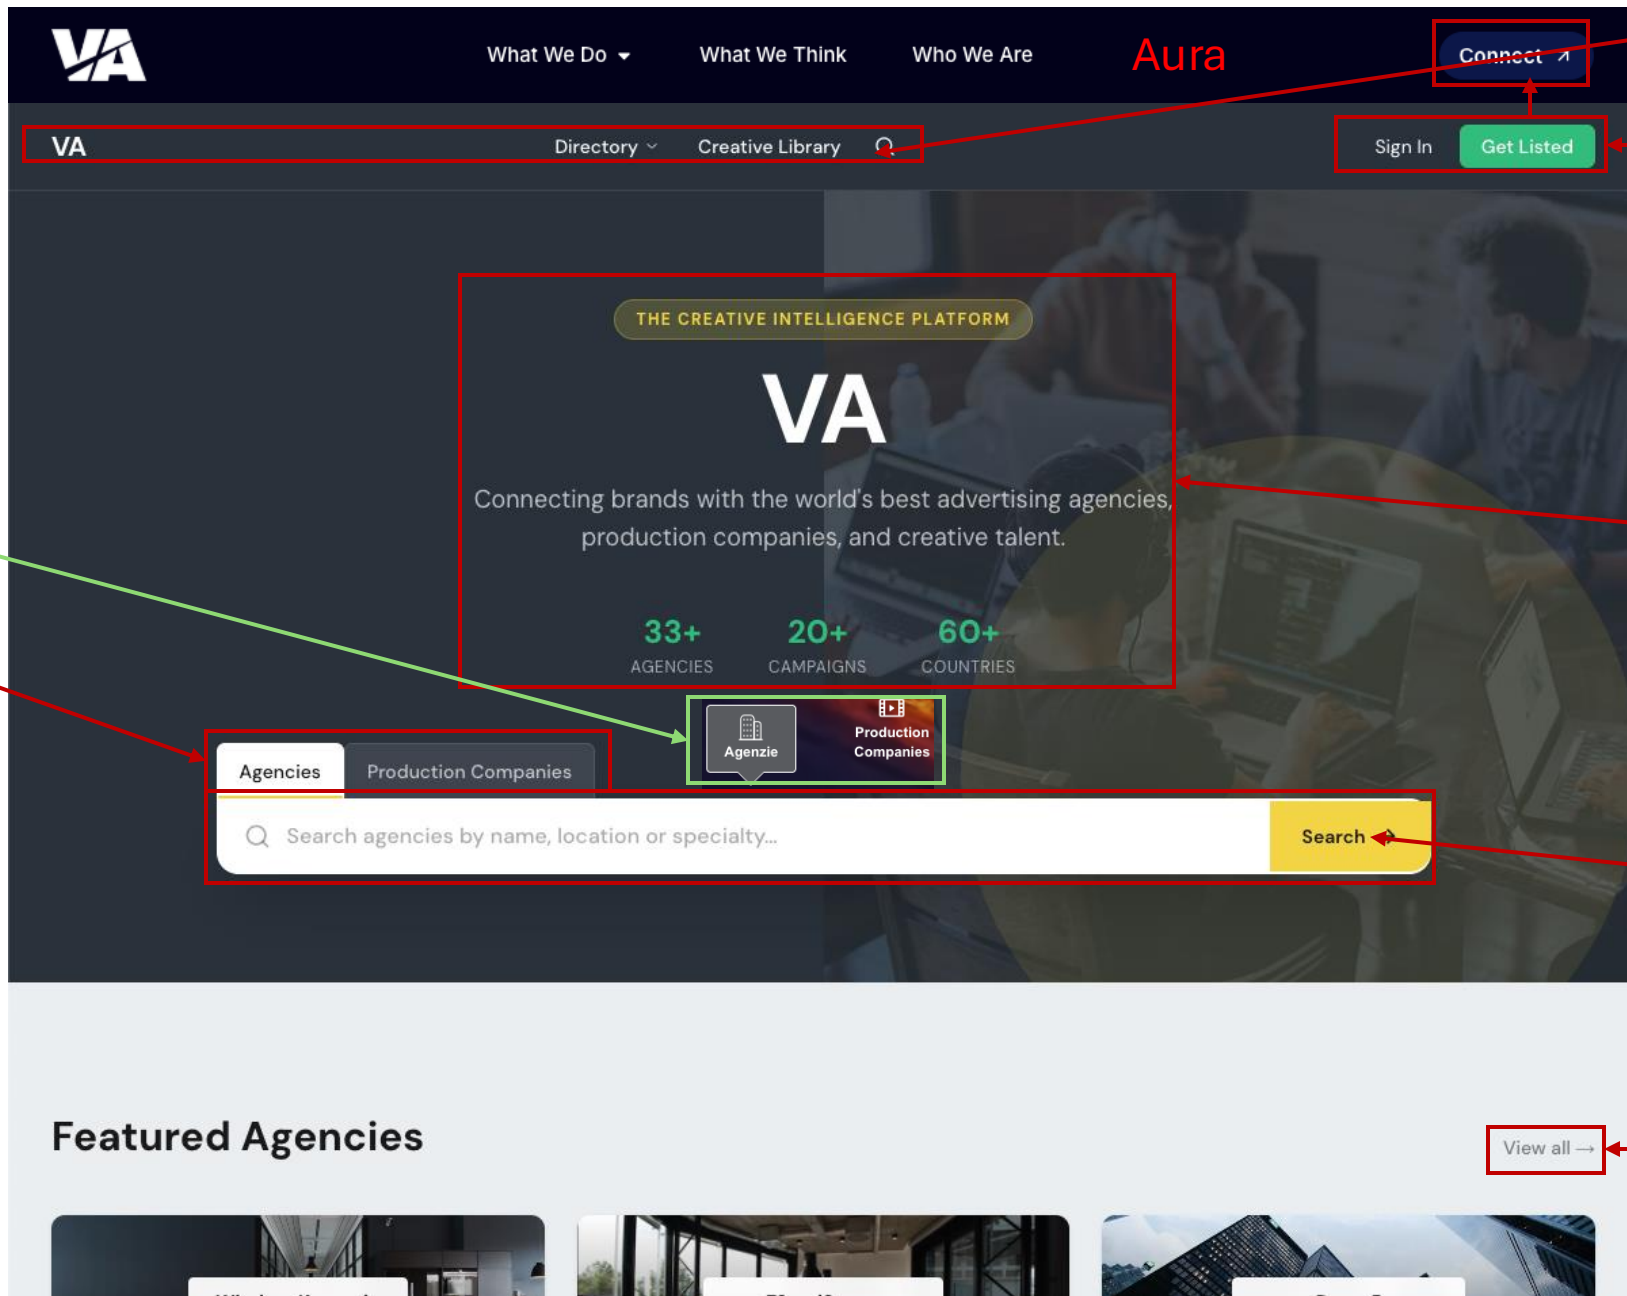

EMPOWERING MARKETING PERFORMANCES

See What We Do ↗

Add a fourth menu item referring to AURA on the current website.

The fourth menu item will replicate the current “What We Do” dropdown structure. It will therefore include sub-links directing to the tool’s functionalities (names to be defined). Yours will be labelled “DB” and will link to the portal you are currently developing.

Aura

Not needed, you can remove

This section should consist of two buttons:

Sign in → to remain as it is.

Sign up → to direct users to a page where they can choose how to register: either as a supplier wishing to register, or as a client seeking greater visibility into agency data.

The **Sign up** button should adopt the same design as the current **Connect** button.

To be define, at this stage you can keep the possibility to write a text

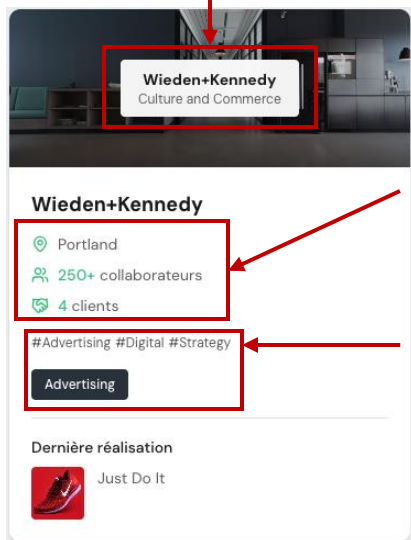

The search bar must align with the website's template design; it cannot be squared.

It should have the same thickness as the current search bar, but with an oval shape — consistent with the buttons and with the title you have inserted.

Remove

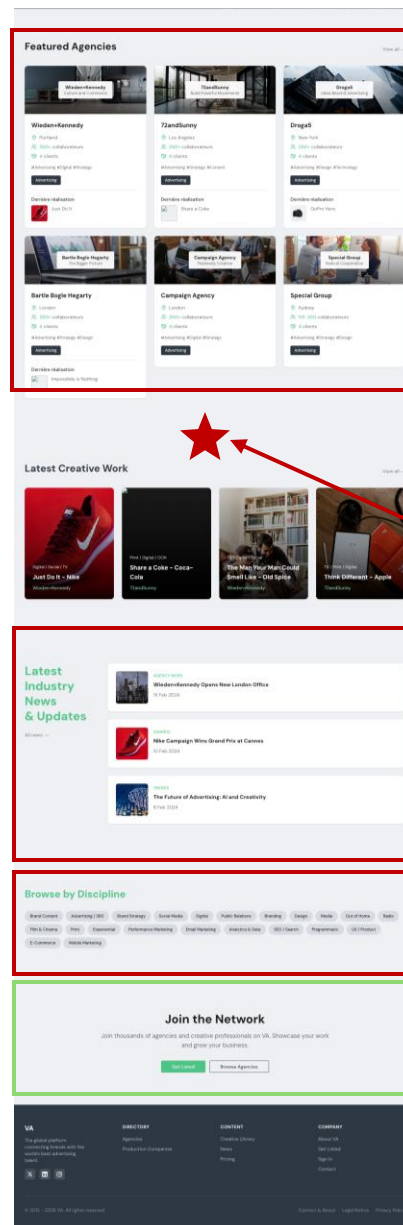

I would prefer to use icons similar to those on AdForum, but centrally aligned.

I assume the logo will be placed here, using the same format as Scanbook.

Add another item «award»

Where are these #tags coming from?

The white used for the cards should be reconsidered so that it sits properly against the dark blue background. In any case, we can address the colour palette in more detail at a later stage.

Background must be on the same color of our current website #02030E

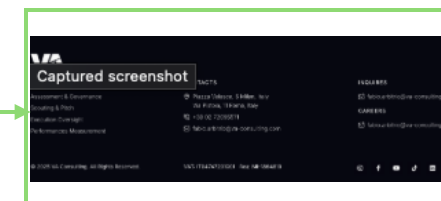

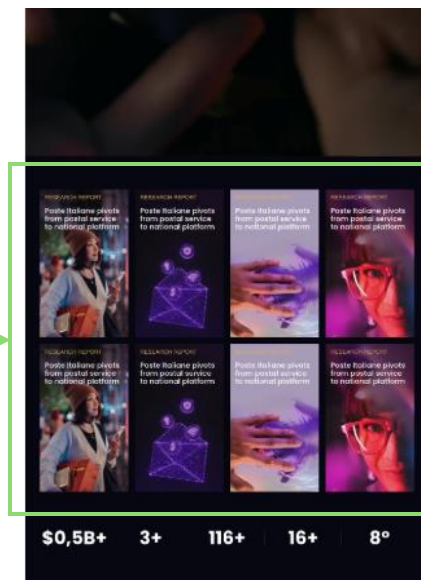

We miss see more agencies (no more than 6 in a block request by request)

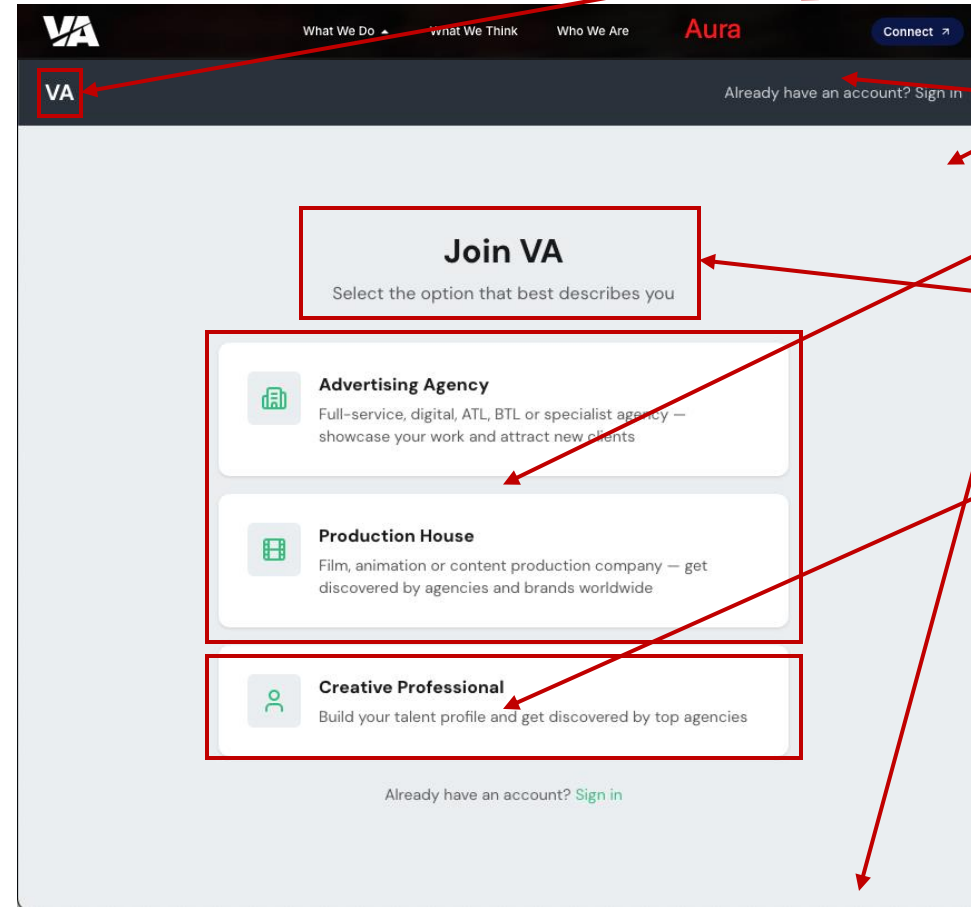

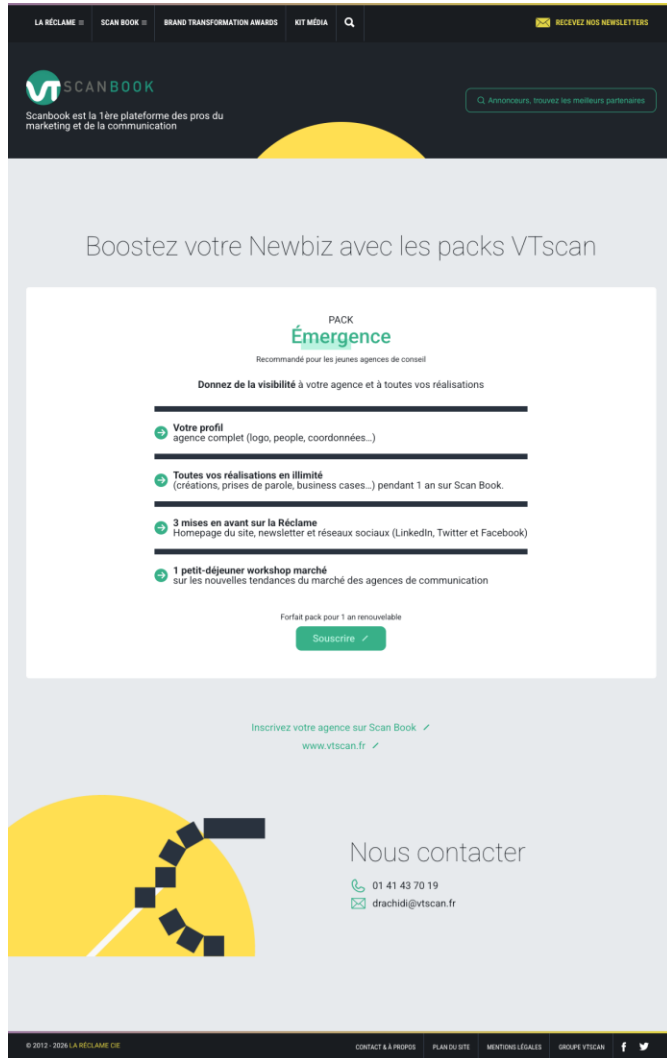

Hide this section maybe in a second moment we can connect what we already have on our website

Remove this section

Ok but we need to think at a copy as «join the network» as a client or as vendor with the same sign up

I guess you will take our footer once you will embed in our template

Always under main menu

remove

Please follow the creative guidelines of previous pages regarding menu, background and footer (do we need a footer here?)

We miss Client

We need to review the copy, no problem at this stage

Hide at this stage, we can use in a second moment. Now we don't have time to dedicate to creative professional

Step 5 «Governance & Sow» can include all these requests

GOVERNANCE & SOW

Kindly detail the control and quality assurance systems established within your designated Creative Network for the purpose of monitoring and managing performance and Service Level Agreements (SLAs).

Please outline the protocols in place for managing client data within your selected Creative Network, particularly if these differ from those of the Holding Group. Furthermore, please specify if your Creative Network utilises its own Data Management Platform (DMP).

With regard to global brand governance, please clarify the distinction between global and local strategies. Describe the processes, including tools, systems, and the level of autonomy within a structured framework, employed to manage global governance and local adaptation.

Please include any additional information that you deem pertinent.

Beyond the visual aspect, what is fundamentally important is that the super admin must be able to modify the fields within the registration sections and/or add new stages with additional sections.

Another important note: in the **Turnover & Clients** section, the years must update automatically. We require a five-year historical view; therefore, in 2026 we would request 2025, 2024, 2023, 2022, 2021. In 2027, we would request 2026, 2025, 2024, 2023, 2022, and so on. This must update automatically.

Additional relevant technical aspects:

When a user completes the registration process, the profile must undergo our review before being published. Final approval and publication must be granted by us.

Users must not be allowed to register with personal email addresses. A restriction should be implemented to accept only corporate domains.

Keep the same dark blue

An important technical note: not all fields should be editable independently by the user. By when do I need to provide you with feedback on which fields can be modified autonomously and which should require our prior approval?

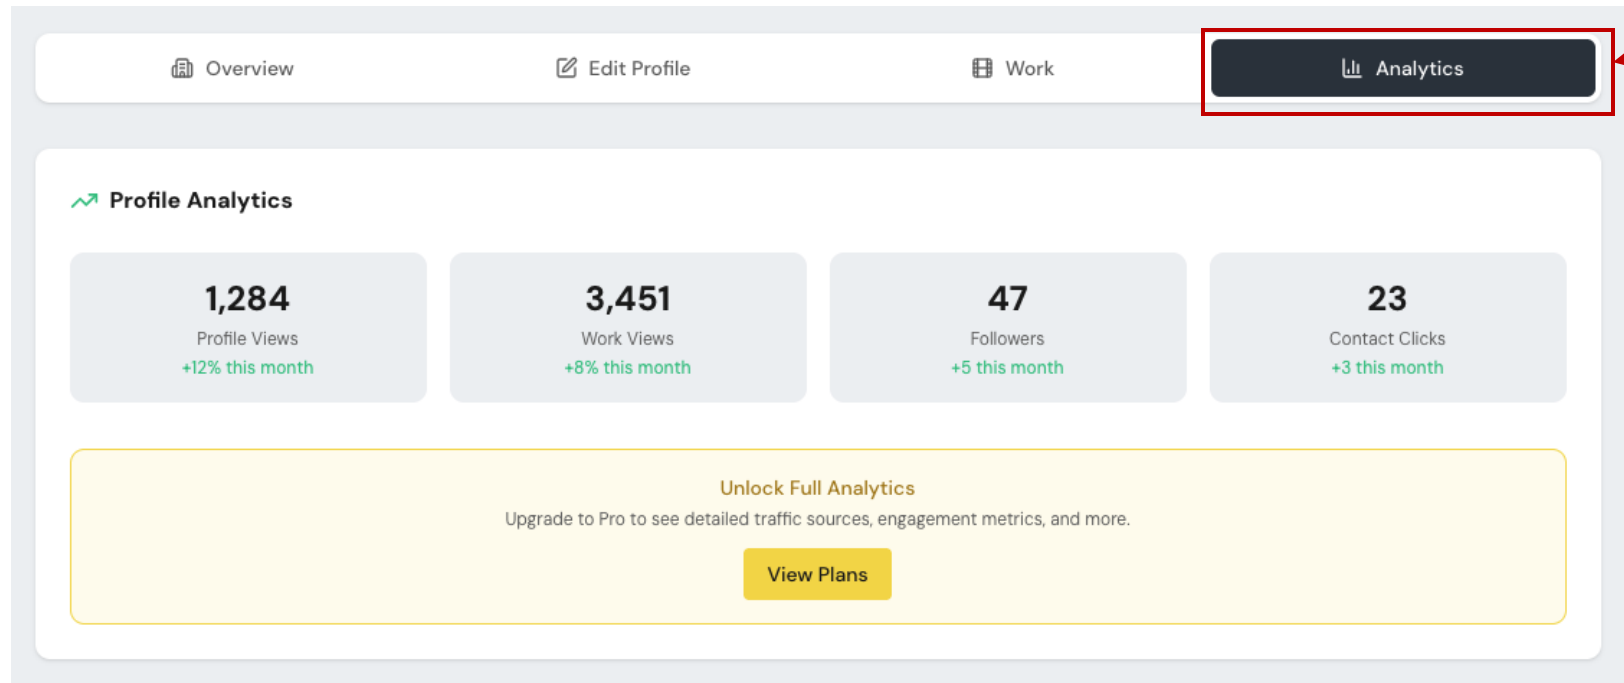

Keep the menu

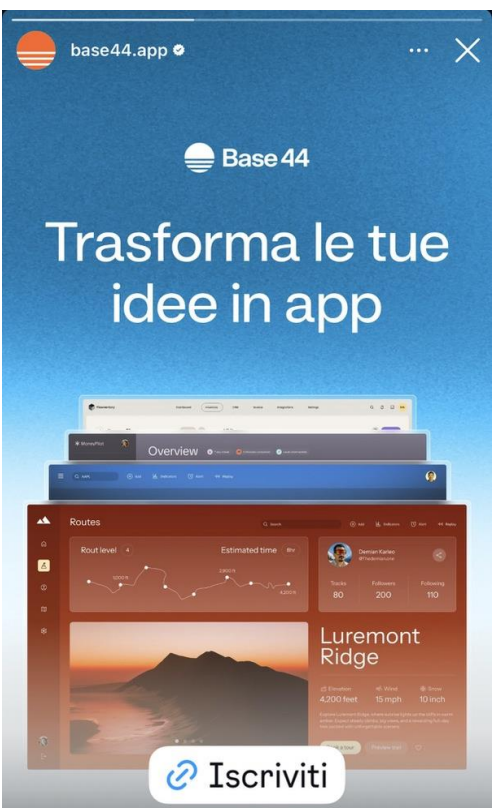

Move here the user icon

Keep the same dark blue

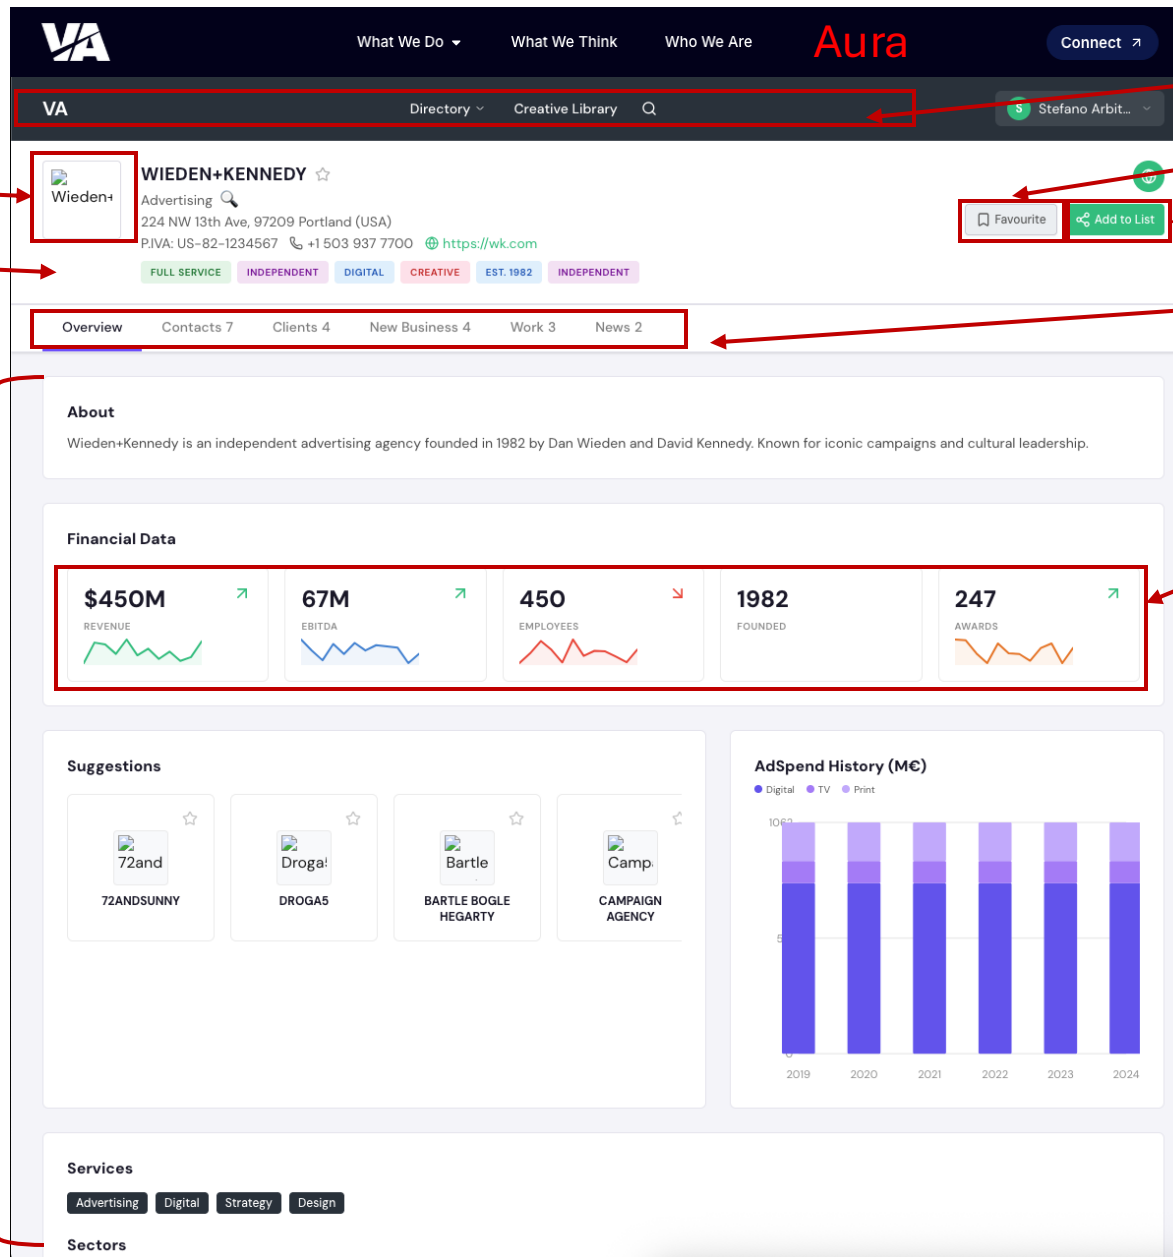

Keep the same dark blue

In the first phase we can hide this section. Once the platform will be populated and it will work we can consider to share analytics

Fancy but not enough.
We should also consider that we will be positioning and selling the platform partly on its aesthetic appeal, particularly in terms of how it showcases agency profiles. It is therefore essential that the pages adopt a refined, futuristic dark look and feel, in line with the example I am sharing with you.

Increase the size of the logo
Consider a cover image
